-----

In this paper, a novel bidirectional hybrid modular multilevel DC-DC converter with balanced arm energy has been proposed. The proposed converter consists of one high ...

A modular and scalable solution that enables independent inverter operation and easy system expansion without redesigning the control structure, adding or changing the ...

The Freqcon MSC is an on-grid and off-grid converter that has the ability to stabilize the grid through active frequency and voltage support. It is compatible with almost all ...

Using a combination of direct current (DC) and triangular carriers in the PWM, the proposed method demonstrates a reduction in THD from 27.55% to 21.76% in phase voltage ...

MMCs, or Modular Multilevel Converters, are defined as an emerging topology for high-power and high-voltage applications that provide modularity and reconfigurable design, suitable for HVDC ...

A 25-level inverter is proposed, simulated, and designed in the laboratory. The experimental results validate the smooth operation of the inverter.

Find your modular frequency inverter easily amongst the 28 products from the leading brands (NORD, SIEMENS, VEICHI, ...) on DirectIndustry, the ...

THD profiles of  $V_{a1b1}$  produced by the 7 level CHB inverter with PS-PWM and LS-PWM. These methods operate at fundamental frequency, therefore without switching losses. Developed by ...

Find your modular frequency inverter easily amongst the 28 products from the leading brands (NORD,

SIEMENS, VEICHI, ...) on DirectIndustry, the industry specialist for your professional ...

This paper reviews the current state of multilevel inverter technology, examining its various topologies, modulation techniques, and applications. It highlights recent advancements ...

In response to the growing demand for fast-charging electric vehicles (EVs), this study presents a novel hybrid multimodule DC-DC converter based on the dual-active bridge ...
