The Clean Communities Investment Accelerator (CCIA) deploys capital to underserved markets where battery storage can provide critical backup power during extreme weather events, ...

This paper reviews the corrosion problems of phase change materials (organic and inorganic) used as energy storage media in latent heat storage systems and compares the ...

Choosing the most appropriate financing option for energy storage systems requires careful evaluation of various factors, including capital availability, project scale, and ...

There are more studies on the corrosion of inorganic PCM and this type of corrosion widely exists in many energy storage fields, such as solar thermal storage systems ...

If you're reading this, chances are you're either an energy developer with a killer battery project stuck in "funding limbo" or an investor wondering why your neighbor keeps raving about ...

Battery energy storage projects face distinct technical challenges that complicate their development and financing. A key concern is the degradation of battery systems over time.

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

While lenders may need to undertake additional diligence before financing an energy storage project, the project finance market for energy storage has grown, and is ...
