A BESS is a large-scale energy storage facility that captures electricity--often from renewable sources like solar or wind--and stores it for use when demand is high or supply is low.

The 20 MW Northern New York Energy Storage project installed and operated by the New York Power Authority connects into the state's electric grid in Chateaugay, NY.

Workers install battery packs in a BMW X5 in South Carolina. A new battery plant under construction nearby will supply BMW factories.

US developers of large-scale battery storage stations have 18.7 GW of new capacity under construction, according to S& P Global Energy Market Intelligence data, ...

Battery energy storage systems supply flexible and affordable electricity when it is needed most, making them an ideal partner for renewables. The three new BESS are paired ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Developments like Suncor Cogeneration Plant, the Greenlight MPC Gas Power Plant, and Cumberland Combined Cycle Gas Plant are under construction to support the ...
