-----  
Where is first solar based?

First Solar announced it will establish a new manufacturing facility in Gaffney, South Carolina, to onshore final production processes for Series 6 Plus modules. The company expects to spend approximately \$330 million to establish the new facility, which is scheduled to commence commercial operations in the second half of 2026.

Where are solar panels made?

Those components are currently made by First Solar's factories overseas, but once the South Carolina plant opens in the second half of 2026, they'll be finished on US soil. The company plans to invest approximately \$330 million in the new site, which is expected to create more than 600 new jobs.

Where are first solar solar modules made?

The company says it will build a new facility in Gaffney, South Carolina, to handle the final production steps for its Series 6 Plus thin film modules. Those components are currently made by First Solar's factories overseas, but once the South Carolina plant opens in the second half of 2026, they'll be finished on US soil.

Why is es foundry launching a solar cell factory?

The launch of ES Foundry's solar cell factory marks a pivotal moment not just for South Carolina but for America's green energy future as well. By prioritizing domestic manufacturing and sustainable practices, this initiative symbolizes hope for expansive growth within both local economies and national energy independence efforts.

First Solar, Inc. announced plans to build a new facility in Gaffney, South Carolina, that will bring the final stages of its solar module production back to the U.S. The new site will ...

Indeed, the arrival of this new solar manufacturing plant in Orangeburg confirms the region's dedication to renewable energy. Likewise, it bolsters the region's reputation as a hub for ...
