How will Oman's new energy policy affect energy storage?

MUSCAT: A new policy framework unveiled by Oman's Ministry of Energy and Minerals last week is expected to lend new impetus to the growth of integrated renewable energy capacity, encompassing not only generation and transmission, but crucially, energy storage as well.

Does Oman need energy storage?

Acknowledging the "absence" of energy storage technologies in Oman, notably because of the "high-costs" involved, the new policy nevertheless seeks to enable the deployment of economically feasible battery storage infrastructure and for these attendant costs to be recouped from large consumers benefitting from such investments.

Is Oman ready for a return to a stable electricity supply?

In recent years, following energy market reforms, Oman has become accustomed to having a relatively reliable and stable electricity supply. However, today with rapidly rising demand, a return to the days of unscheduled power outages and voltage fluctuations could just be round the corner.

What is Oman's 'electricity self-generation direct sales and Wheeling policy'?

According to experts, the 'Electricity Self-Generation, Direct Sales, and Wheeling Policy' - also referred to as 'New Renewable Energy Policy' - seeks to underscore, among other key objectives, the significance of electricity storage in achieving Oman's Net Zero goals.

These policies collectively represent a pivotal move toward bolstering renewable energy use in Oman, aligning with its sustainable development goals and energy transition ...

Muscat - Oman will soon announce its first renewable energy storage project as part of ongoing efforts to expand clean energy capacity and reduce dependence on ...

Designed for policymakers, renewable energy developers, and tech-savvy environmentalists, this megaproject could become the Middle East's blueprint for grid resilience.
