Could a seafold 40' container slash the cost of repositioning empty containers?

More than a fifth of containers are returned empty to their port of origin empty, according to estimates. CCS claims that the SeaFold 40' box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon emissions by 70%.

What is a seafold container?

In maritime operations, SeaFold containers deliver substantial cost savings for one-way cargo shipments through more efficient loading and unloading procedures. Their design allows for additional stowage space on mainline and feeder vessels, which in turn reduces the vessel's time in port.

What is a returnable foldable large container (FLC)?

For improved space and capacity utilisation ORBIS has introduced a returnable foldable large container (FLC). The OceanPak plastic bins stackable and collapsible when empty. That increases efficiency and minimizes transport costs during intercontinental shipping, especially during the return transport.

How many seafold containers are empty?

The SeaFold container opened out and stacked Credit: Compact Container Systems More than a fifth of containers are returned empty to their port of origin empty, according to estimates.

CCS claims that the SeaFold 40" box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon ...

In maritime operations, SeaFold containers deliver substantial cost savings for one-way cargo shipments through more efficient loading and unloading procedures. Their design allows for ...

Below is an exploration of solar container price ranges, showing how configuration choices capacity, battery size, folding mechanism, and smart controls drive costs. Prices span ...

As a result, about 25% of the 180 million containers transported on sea are empty, representing a high

repositioning cost of EUR 25 billion a year for shipping lines. If foldable, several shipping ...

According to industry estimates, the cost of producing a standard cardboard folding container can be around 15-20% less than that of a comparable rigid box when produced at ...

Collapsible containers are typically two to three times the cost of a standard container. The question is whether the use of a collapsible container can reduce costs to such ...

Foldable containers drastically reduce return trip costs by decreasing the volume of empty containers, translating into lower fuel use and fewer trips. This is especially relevant in long ...

The impact of fuel price, container transportation quantity, ship tanker capacity and carbon tax rate on ship refueling strategy, speed and deployment is investigated.

Foldable containers drastically reduce return trip costs by decreasing the volume of empty containers, translating into lower fuel use and fewer ...

As a result, about 25% of the 180 million containers transported on sea are empty, representing a high repositioning cost of EUR 25 billion a year for ...

CCS claims that the SeaFold 40" box could potentially slash the cost of repositioning empty containers by 56%, save storage space by ...

The impact of fuel price, container transportation quantity, ship tanker capacity and carbon tax rate on ship refueling strategy, speed and ...
