How do solar windshields work?

To understand how this works, this post will discuss the construction and mechanics behind solar windshields. Solar glass (also known as solar coated glass, tinted glass, or solar attenuating glass) combines several components that help reduce the amount of ultraviolet radiation (UV rays) and infrared light that enters your car.

Can you put solar glass on a car?

You're likely to see solar glass on cars or buildings, and this technology serves the same purposes regardless of where you find it. Embedding solar glass on a car helps save energy by reducing the intensity of the sun's heat to keep the interior cooler.

Does a solar windshield save energy?

Embedding solar glass on a car helps save energy by reducing the intensity of the sun's heat to keep the interior cooler. To understand how this works, this post will discuss the construction and mechanics behind solar windshields.

Are solar-coated windshields worth it?

Solar glass gives your car an extra layer of protection that adds to its overall appearance. The tinted windows are sure to boost the aesthetic value of your vehicle, making it look stylish and modern. Maintaining solar-coated windshields is relatively straightforward.
