What is a remote solar power system?

Solar Illuminations' standalone remote solar power systems are great renewable energy solutions for powering small electronics in remote sites, or areas difficult to access grid power.

What is an off-grid remote solar power system?

These off-grid standalone remote solar power systems can be DC or AC power with the use of a power inverter. They can be used as a backup power, and emergency power for when/if grid tie power fails, or can be used as a permanent energy source for remote locations.

How do you price out an off-grid Solar System?

An AC system with a back-up generator is typically designed to handle all of your home's energy needs; as such, the size will vary based on the size of your home and your energy consumption. Another way to price out an off-grid solar system is to consider the cost of each different component.

How can a solar incentive program help you save money?

In addition to loans, various solar incentive programs are available that can significantly offset the initial costs of setting up off-grid solar power systems.

Low wholesale prices on complete enclosed off-grid solar systems for radio, data, monitoring & other industrial applications. Over 20 years of experience..
