Is RIX Riga Airport sustainable?

RIX Riga Airport has taken significant steps to become a greener, more energy-efficient, and sustainable transport hub in the Baltics. With a series of sustainability initiatives now in place, the Airport continues its path towards climate neutrality, creating an environment that benefits both people and nature.

What is Riga airport's sustainability strategy?

A cornerstone of Riga Airport's sustainability strategy is the updated "Net Zero" roadmap. The airport has committed to achieving climate neutrality by 2035, substantially reducing greenhouse gas emissions and investing in green technologies.

Is Riga Airport achieving climate neutrality by 2035?

Riga Airport is implementing a range of sustainability measures as part of its goal to reach climate neutrality by 2035. The airport has achieved Level 3 in the Airport Carbon Accreditation programme, reflecting progress in reducing direct CO2 emissions and engaging stakeholders in climate initiatives.

Solar parks were added to airport buildings, and a larger solar power station is being designed on the airfield. These efforts are part of a broader strategy to reduce CO2 ...

Renewable energy plays a central role in this transition - in 2024, new solar panel parks were installed on Airport buildings, while design work has begun on a large new solar ...
