Romania advances energy transition with major battery storage and solar panel manufacturing milestones. Romania's Ministry of Energy has reached two additional ...

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The ...

In response to EU Regulation 2019/943, which clarifies the role of storage and its ownership status, the Romanian authorities transposed in Law 155/2020 (amending Energy ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone ...

Trina Storage is set to supply a 65MWh battery energy storage system (BESS) for a new project in Romania, marking its first deployment in the country. The initiative, located in ...

The system utilizes a solar cell to capture energy from sunlight and a supercapacitor to store the collected energy. This design simplifies the implantation process and potentially ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone systems.

In response to EU Regulation 2019/943, which clarifies the role of storage and its ownership status, the
