Who is Slovak solar?

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with the main idea - to provide companies specialised in the installation of solar systems with access to first-class photovoltaic products, all from one place.

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

Why is double glass important for solar panels?

Double Glass is especially important in photovoltaic facilities such as solar power plants and with the expected long service life of modules such as AKCOME, Jinery or Jollywood. Why solar panels with glass-glass Technology? Why is solar double glass more durable?

What are the benefits of double glazed solar panels?

Double-glazed modules are characterized by increased reliability, especially for large-scale photovoltaic projects. They include better resistance to higher temperatures, humidity and UV conditions, and have better mechanical stability, reducing the risk of microcracks during installation and operation.

Compared to traditional single glass modules, double glass modules offer significant advantages, particularly in terms of efficiency and durability. The rear glass layer can absorb reflected light, ...

With 14 years of expertise, EK SOLAR specializes in monocrystalline photovoltaic systems for industrial and residential applications. Our Kosice facility produces 850 MW annually, serving ...

Agora Solar deliberately chose a production line that can be converted to other formats in a short time, noting that it also plans to manufacture semi-transparent, glass-glass modules for building ...

Double Glass is especially important in photovoltaic facilities such as solar power plants and with the expected long service life of modules such as AKCOME, Jineryg or Jolywood.

The focus in production will be on semi-transparent glass-glass modules, with transparency levels of up to 50 per cent. This is particularly crucial for building integration ...

Slovakian manufacturer Agora Solar plans to build a 150 MW plant in Vranow in the east of the country. The plant will produce double-sided glass panels and may have a ...

We manufacture both frame and frameless photovoltaic panels in ultra-thin designs and a variety of colours that can be customised. Our bifacial ...

We offer photovoltaic panels, photovoltaic inverters, battery storage and other components necessary for the construction and ...

The new module will be manufactured by Agora Solar in Vranow, Slovakia, from the third quarter, a Grid Parity spokesman ...

We manufacture both frame and frameless photovoltaic panels in ultra-thin designs and a variety of colours that can be customised. Our bifacial double-glass panels capture solar radiation ...

We offer photovoltaic panels, photovoltaic inverters, battery storage and other components necessary for the construction and installation of solar energy systems. We have ...

The new module will be manufactured by Agora Solar in Vranow, Slovakia, from the third quarter, a Grid Parity spokesman explained when asked by pv magazine.
