Announced by China Southern Power Grid (CSG) on May 26, this state-of-the-art facility integrates both Lithium-ion and Sodium-ion Battery technologies on a large scale to ...

China Southern Power Grid (CSG) announced on May 26 the commissioning of the Baochi Energy Storage Station in Wenshan, Yunnan province -- a national pilot project and ...

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world.

Sodium-ion batteries, developed with China's proprietary technology, offer higher thermal adaptability and greater raw material security. Their maximum output and response ...

The viability of cheaper sodium-ion batteries in an energy storage system at the grid level has been proven by the first utility station that is now operational.

State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into ...

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online.

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it ...

Peak Energy debuts the US's first grid-scale sodium-ion battery, cutting costs and boosting reliability with

passive cooling tech.

State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into operation in central China's Hubei province on ...

July 12, 2024: The first phase of China's state-owned Datang Group's new energy storage power station has been connected to the grid in Qianjiang, Hubei Province, making it the world's ...
