---

The current study looks at a hybrid passive cooling system that combines a solar chimney with an earth-to-air heat exchanger (EAHE) ...

Two types of natural ventilation systems that can be used in buildings to reduce cooling loads and enhance air quality while utilizing renewable energy are solar chimneys (SC) ...

Airxchange&#174; design and manufacture the next generation of energy recovery products from ERV Wheels and Plates that perform for the life of a HVAC ...

This paper is an experimental study of a solar chimney coupled with Earth-to-Air Heat Exchanger (EAHE) system. The design hardware is Arduino monitoring systems. The ...

Air conditioning system with intelligent charging management that optimizes energy efficiency through solar-powered charging. The system comprises an indoor unit and at ...

In this paper, the combined performances of a solar chimney and Earth-to-Air Heat Exchanger (EAHE) system have been computationally studied. The study focuses on ...

The purpose of these air exchangers are to provide fresh air into the air system along with dehumidifying the existing air to ensure your home isn't creating mold growth. These systems ...

Airxchange&#174; design and manufacture the next generation of energy recovery products from ERV Wheels and Plates that perform for the life of a HVAC system.

Solar air heating systems harness the power of the sun to provide sustainable and cost-effective heating for residential and commercial spaces. These systems utilize solar collectors, ...

Solar air heating systems harness the power of the sun to provide sustainable and cost-effective heating for residential and ...

The vents of earth-air heat exchangers were improved. The results showed that when the width of the vent was 0.5 m and the length was 3~4 m, the air velocity in the crop ...

In a solar-assisted heating system, the outdoor heat exchanger works by absorbing heat from the outdoor air or ground and transferring it to the ...
