What is onsite solar?

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.

Should you choose onsite or onsite solar?

While both offsite and onsite options offer project structuring with no upfront installation costs and provide renewable energy at a fixed cost, the two system types ultimately can offer their own distinct benefits. When deciding between onsite or offsite solar, let PowerFlex help you choose which option is best for your company.

Is offsite solar better than onsite solar?

Regardless of the exact method, participating in offsite solar can have upsides similar to onsite. While both offsite and onsite options offer project structuring with no upfront installation costs and provide renewable energy at a fixed cost, the two system types ultimately can offer their own distinct benefits.

What is an offsite Solar System?

An offsite solar system is not located on the purchaser's property but still allows the purchaser to benefit from the renewable energy it produces in the form of credits that are used to offset their facility's energy costs.

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.
