---

Solar cycle, period of about 11 years in which fluctuations in the number and size of sunspots and solar prominences are repeated. Solar cycle 25 began in 2019 and will reach maximum in ...

Solar cycle predictions are used by various agencies and many industry groups. The solar cycle is important for determining the lifetime of satellites in low-Earth orbit, as the drag ...

Our Sun goes through what we call a "solar cycle" every 11 years or so. Then, the Sun's magnetic field completely flips! Learn more ...

The Sun's magnetic field goes through a cycle, called the solar cycle. Every 11 years or so, the Sun's magnetic field completely ...

What is the Solar Cycle? The solar cycle is an approximately 11-year cycle experienced by the Sun. During the solar cycle, the Sun's stormy behavior builds to a maximum, and its magnetic ...

Individual sunspots come and go, with lifetimes that range from a few hours to a few months. If a spot lasts and develops, it usually consists of two ...

One of the most striking features of the sun's activity is what astronomers call the solar cycle. This is an epic rise and fall in the sun's level of activity that repeats every 11 years ...

What is a Solar Cycle? The solar cycle is the approximately 11-year period of change in the Sun's activity levels. This cycle is characterized by the rise and fall of sunspots, ...

One of the most striking features of the sun's activity is what astronomers call the solar cycle. This is an epic rise and fall in the sun's ...

Individual sunspots come and go, with lifetimes that range from a few hours to a few months. If a spot lasts and develops, it usually consists of two parts: an inner darker core, the umbra, and a ...

Solar cycle, period of about 11 years in which fluctuations in the number ...

What is the Solar Cycle? The solar cycle is an approximately 11-year cycle experienced by the Sun. During the solar cycle, the Sun's stormy ...
