---

These composite wheels were composed of aluminum oxide as abrasive and reinforcement material, E-glass as a reinforcement ...

Diamond grinding wheel for solar glass is developed to meet the requirement for glass grinding in solar panels. This kind of wheel is mostly suitable for all straight line machines, double edger ...

The invention discloses a special grinding wheel for solar photovoltaic glass and a manufacturing method of the special grinding wheel.

This type of diamond grinding wheel is metal bond with selected diamond abrasive grains. Specially used for photovoltaic glass grinding.

At our online stores, we offer a comprehensive catalog of wholesale solar glass grinding wheel under our abrasive tools collection for mechanical grinding and abrasion.

Inland manufactures wheels for solar glass production for all types of edgers including Bavelloni, Bottero, Glassline, Schiatti, and others. Inland's bond matrix provides the capability of running ...

Metal Diamond Wheel mainly used for processing the four edges of rectangular glass, which is suitable for photovoltaic panel glass and home ...

These composite wheels were composed of aluminum oxide as abrasive and reinforcement material, E-glass as a reinforcement material, and phenolic resin as the matrix ...

When the motor speed is 3600-4600r/min, the glass travel speed is 10-12m/min, and the processing of 3.2mm solar glass can reach more than 15000; It can be used on high-speed ...

SUPER-CUT diamond pencil edging wheels are engineered to meet the requirements for glass used in solar panels. We manufacture pencil edging wheels for all straight line machines, ...

Metal Diamond Wheel mainly used for processing the four edges of rectangular glass, which is suitable for photovoltaic panel glass and home appliances glass. The thickness of the ...

Ideal for the glass fiber industry, these wheels exhibit remarkable strength, thermal shock resistance, and corrosion resistance. Benefit from their high mechanical strength, thermal ...
