With its unprecedented scale and forward-thinking design, the MTerra Solar Project is a cornerstone in the Philippines' clean energy ...

The world's biggest solar power and battery project just kicked off construction in the Philippines, marking a major step toward a clean energy-dominated future in Southeast ...

Our factory is located in Batangas of the Philippines. We own four production lines, two lines of the solar cells and two lines of the solar panels with an annual capacity up to 1GW.

Gstar Solar has started commercial production of modules at its solar cell and module plant in the Philippines.

MANILA, Philippines -- A floating solar power plant on a reservoir in Cebu has begun supplying energy to a copper mine, marking the country's first megawatt-scale ...

With its unprecedented scale and forward-thinking design, the MTerra Solar Project is a cornerstone in the Philippines' clean energy transition. Its Solar PV-BESS hybrid ...

The successful launch of the Philippine factory marks another milestone in Gstar's global footprint, further completing its industrial layout, enhancing competitiveness in the ...

The solar park, called Terra Solar, will have 3,400 to 3,500 MW of solar panels and 4,000 MWh of battery storage. It will be built on an 3,500 hectares of forest land in Nueva Ecija ...

This analysis examines the two primary pathways for a new solar module factory in the Philippines. We contrast the stable, policy-driven local market with the scalable, yet more ...
