-----  
How much will solar panels cost in 2025?

In 2025, the average cost to install solar panels is expected to be around \$20,552 for an 11 kW system after applying federal tax credits. This is a substantial drop compared to previous years. The price per watt has also decreased, with an average of about \$2.56 per watt before incentives.

How much do solar panels cost?

The cost of solar panels isn't directly tied to the size of your house. Instead, it depends on your energy consumption. That said, for an average household with typical energy needs, you might expect to pay between \$18,000 and \$38,000 for a solar system before incentives. The system size you need is usually between 5 kW and 15 kW.

How much do solar panels cost in New York?

As of January 2025, the average solar panel system costs \$2.92/W including installation in New York. For a 5 kW installation, this comes out to about \$14,608 before incentives, though prices range from \$12,417 to \$16,799. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a solar panel cost at Lowes?

A typical price for a Solar Panel is \$250 but can range from approximately \$20 to \$2,783. These Solar Panels are the most popular among Lowe's entire selection. While these are popular, we recommend ensuring that the Solar Panels you consider have the right mix of features and value.
