---

Find out how flow batteries could revolutionize the renewable energy sector, with Australia in pole position through strategic investment. Explore the challenges and opportunities linked to this ...

In Australia, Queensland-based company ESI Asia Pacific is planning to develop their own iron flow batteries at a new factory in Maryborough once construction is complete in ...

For Australia, this presents an exciting economic opportunity -- not only to supply the growing global demand for vanadium and flow battery solutions, but to establish itself as a ...

Discover clean, reliable power with Australian Flow Batteries. Fast to deploy, modular, and sustainable, our systems replace diesel for remote communities, mines, ports, and emergency ...

Australia's first megawatt-scale vanadium flow battery was installed in South Australia in 2023. The project uses grid scale battery storage to store power from a solar farm.

Enter flow batteries --a homegrown technology that could reshape Australia's energy future. Unlike lithium-ion batteries, which max out at four to six hours of storage, flow ...

In Australia, Queensland-based company ESI Asia Pacific is planning to develop their own iron flow batteries at a new factory in ...

Innovators, energy leaders and experts from around the world recently gathered at UNSW Sydney to commemorate a groundbreaking milestone in renewable energy storage: ...

The Symposium, taking place on 15-16 October, will bring together key players across the flow battery supply chain, including researchers, industry leaders, and government ...

With approximately 25 per cent of the world's vanadium reserves located within its borders, UNSW Sydney said Australia is positioned to develop a robust flow battery industry, ...
