Why should you buy a laptop charger?

They're generally much bigger, heavier, more powerful, and more rugged than power banks and portable laptop chargers, which gives them more versatility for activities like camping, tailgating, working in a remote corner of your home, screening a movie in your backyard, or staging a scenic photoshoot.

Is USB charging a good idea?

USB charging is nice to have as a backup, but it's slower. Some models can also recharge through a car power socket or a solar attachment, which is invaluable if you're off-grid for more than a couple of days. At least a one-year warranty: A one-year warranty ensures that you actually get to use the thing before its warranty expires.

How much power does a battery charger need?

Each model needs a max output rating of 200 W or more, letting you charge a high-power device or a few low-power devices at once. Each model must weigh 50 pounds or less, so an average adult can load it in and out of a car or tote it around a campsite. This unit offers lots of power in a portable, durable, easy-to-use package.

What is the best portable power station?

This unit offers lots of power in a portable, durable, easy-to-use package. Plus, it has a wide array of outlets and charging ports to keep your essential devices running off-grid. The EcoFlow River 2 Pro is the best portable power station for most people. It's relatively light, ruggedly built, intuitive to use, and reliable.
