How will energy storage impact New York?

Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage. All of this while creating an industry that could employ at least 30,000 New Yorkers by 2030.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

Are energy storage projects safe in New York State?

New York State has some of the most rigorous safety standards for energy storage projects in the country, reinforced by independent nationally recognized experts to ensure full compliance.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 ...

When New York City's largest battery storage installation is complete, it will be able to power more than 10,000 households during ...

The proposed Implementation Plan filed by NYSERDA and approved by the PSC with modifications will help facilitate the development of 3,000 MWs of new bulk energy ...

This diverse resource includes energy storage that can provide dispatchable power on intra-day and/or

multi-day time-scales, and includes various types of mechanical energy storage, ...

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk ...

Applications are invited for New York's first competitive solicitation for a gigawatt of grid-connected energy storage facilities.

A US solar industry group has outlined a nine-point policy agenda calling on New York City's incoming mayor to accelerate rooftop solar and battery deployment to address grid ...

Fears of massive battery fires spark local opposition to energy storage projects 1 of 6 | Facing growing electricity demands partly fueled by AI and warm weather, New York is beginning to ...

Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

When New York City's largest battery storage installation is complete, it will be able to power more than 10,000 households during peak demand periods. It will also be the ...
