What are the tariffs affecting battery energy storage?

The tariffs affect a range of clean energy imports including EVs, solar PV, battery energy storage, and inputs for these. This briefing focuses on the tariffs affecting battery energy storage. Policy changes affecting the solar portion of the Section 301 tariffs are addressed in a separate briefing.

What are China's new tariffs on lithium-ion batteries?

On May 14, 2024, the Biden Administration announced changes to section 301 tariffs on Chinese products. For energy storage, Chinese lithium-ion batteries for non-EV applications from 7.5% to 25%, more than tripling the tariff rate. This increase goes into effect in 2026. There is also a general 3.4% tariff applied to lithium-ion battery imports.

What is the import code for lithium ion batteries?

Lithium-ion battery modules, packs, and container blocks are generally categorized under the import code 8507.6020 if they are used for non-EV applications. As such, we believe that this is the code that this tariff change will apply to.

Are lithium battery imports facing increased customs scrutiny?

Industry data shows that importers of lithium battery systems now face increased customs scrutiny, with classification codes determining exact rates. Many battery packs assembled in the U.S. still rely on imported cathodes, anodes, and electrolytes in the electric vehicle sector.

This briefing focuses on the tariffs affecting battery energy storage. Policy changes affecting the solar portion of the Section 301 tariffs are addressed in a separate briefing.
