-----

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas. It's ...

Vienna has implemented its photovoltaic initiative in record time: The target of 250 megawatt peak (MWp) solar power capacity was reached ten months earlier than planned.

The impressive Neo-Gothic building of the Vienna City Hall was built in the 1870s and 1880s during the Austro-Hungarian empire and for a very brief period it was even the ...

The BIPV system on the administrative building of TU Vienna is one of Austria's largest building-integrated PV systems. The modules are ...

Although Vienna is densely built, according to current estimates, about half of the rooftops in Vienna are technically suitable for photovoltaic systems. This corresponds to several thousand...

In the future, the Vienna State Opera will use solar power for its building services, ventilation and corridor lighting. This power will be generated by a 100-kilowatt photovoltaic ...

The building, which dates back to 1891, has been fitted with a solar energy system. The planners at ATB Becker from Absam in Tyrol have carefully integrated the new ...

Our comprehensive approach include state-of-the-art windows, doors, ventilation systems for passive houses, automatic biomass heating, solar systems, and rigorous building ...

We aim to increase solar electricity production fivefold by 2025, and by 2030 some 530,000 Viennese citizens will be supplied with solar power made in Vienna. The roofs and facades of ...

The building, which dates back to 1891, has been fitted with a solar energy system. The planners at ATB Becker from Absam in Tyrol ...

The photovoltaic system of the new office building at the AKH Wien (Vienna General Hospital) shows that not only rooftops but also the facades of skyscrapers can be modern ...

The BIPV system on the administrative building of TU Vienna is one of Austria's largest building-integrated PV systems. The modules are mounted on the building's facade, roof, staircase and ...
