-----  
How much energy will Aarhus produce in 2030?

It is estimated that the combination of 1,600 hectares of solar energy and 10 new wind turbines combined would lead to a reduction in CO2 emissions of 12,000 metric tons in 2030 and generate approx. 1,450 GWh annually, which corresponds to about 50% of Aarhus' projected electricity consumption in 2030.

Will Aarhus be a 'green district heating of the future'?

Aarhus is committed to taking the next steps toward an even greener energy supply system, and with 'the green district heating of the future', we can phase out fossil fuels and get down to 15% biomass in 2030.

How much CO2 does Aarhus emit?

In 2022, the energy sector in Aarhus emitted 698,000 metric tons CO2e. Today, about 70% of Aarhus' energy needs are met by sustainable energy sources, including biomass, which covers 69% of the municipality's energy needs.

Does the city of Aarhus have a goal of self-sufficiency?

In addition, power from wind turbines and solar energy - associated with the City of Aarhus' entities - outside of the municipal boundaries can be included in the City of Aarhus' goal of greater self-sufficiency.

As Denmark's second-largest city, Aarhus is leading the charge in renewable energy adoption. Solar rooftop systems have become a cornerstone of its ambitious climate action plans. Let's ...

In 2022, Aarhus consumed 1,700 GWh of power, and an increase in consumption is projected, reaching 2,900 GWh in 2030. It is thus absolutely crucial that we expand renewable energy ...

In the future, the plant may also include solar power, energy storage, systems that capture and reuse waste heat, and Power-to-X technologies that combine captured CO2 from ...

A team of more than 70 people in Aarhus has been tasked with thinking beyond wind to help the company become a global leader in sustainable energy - including ...

The city has invested in renewable energy projects, particularly wind and solar power. Aarhus aims to be carbon-neutral by 2030, implementing ...

Some of the most notable renewable energy companies in Aarhus include Vestas, which is a leading manufacturer of wind turbines, and Aarhus Vand, which is a company that provides ...

Imagine having a Swiss Army knife for energy management - that's essentially what mobile energy storage brings to the table. In Aarhus, Denmark's innovation hub, these systems are ...

The city has invested in renewable energy projects, particularly wind and solar power. Aarhus aims to be carbon-neutral by 2030, implementing initiatives such as extensive recycling ...

PowerVault Technologies - Denmark's second-largest city, Aarhus, has become a living laboratory for innovative energy storage solutions. With wind power supplying over 50% of its ...

That's exactly what Aarhus-based energy storage systems aim to achieve. As Denmark pushes toward carbon neutrality by 2050, innovative power production models combining battery ...

Denmark has a tradition of holistic planning, which involves planning across different energy sectors to increase energy efficiency, reuse resources, and save money. The mindset is about ...

A team of more than 70 people in Aarhus has been tasked with thinking beyond wind to help the company become a global leader in ...
