Why does my base station go offline?

Network Connectivity: Poor network connectivity or issues with the Wi-Fi router can cause the base station to go offline. Troubleshooting the network connection, ensuring the base station is securely connected to the router, and minimizing signal interference can help resolve the issue.

What happens if your RTK base station is not set correctly?

Think of your RTK base station like an anchor. It sends corrections to your rover so your measurements are precise. But if that anchor isn't placed correctly, everything you measure will be off -- sometimes by several feet. If not setup correctly, your day-to-day measurements won't line up.

How do I fix a faulty base station?

To fix this issue, you can follow these steps: 1. Check the power supply and make sure that the base station is properly plugged in. 2. Verify the Wi-Fi connection and ensure that the base station is within range. 3. If the problem continues, try restarting the base station or performing a factory reset.

Why is my base station not broadcasting?

The software sets up all radio and receiver operating parameters, and is the most likely route to a successful problem resolution once you have checked all connections, cables, and batteries. The base station is not broadcasting. See Base station is not broadcasting below. Incorrect over-the-air baud rates between base station and rover.

However, sometimes during the RTK setup process, issues ...

Check The Placement of Your Base Station
Reset The Base Station
Before Getting Started
To rule out any interference that could impact the Base Station's connection, make sure that the Base Station is at least 3 feet off the ground and is on a non-dense material like wood or glass. We also recommend placing the Base Station in a central location in your home, and to keep it out of enclosed spaces like cabinets or closets. Connection e...See more on support.simplisafe trimble Troubleshooting base station setup and static measurement ...
