Can a solar inverter be viewed online?

If you are receiving energy from your system and want to view production online, connect your inverter to the internet. How long does it take to replace a damaged solar panel?

How do I report a problem with my solar panel system?

If you need to report an emergency related to your solar panel system, visit First Responders. Locate the relevant troubleshooting section below if you have received an alert from us, or if your system is experiencing a problem. Click the 'Troubleshoot' button in that section to start the process.

Why is my Enphase powerline not working?

Causes can range from temporary powerline communication glitches to hardware or wiring issues. Start by checking your system in the Enphase App (ARRAY tab)--tap on the affected panel to see when it last reported. Often, the issue is resolved on its own, but if it persists for over 24 hours, you may need to troubleshoot further.

How can you prevent energy loss?

Small issues--like a device going offline or a drop in energy production--can go unnoticed without regular checks. By monitoring system indicators such as device connectivity, production trends, and system alerts, you can catch problems early and avoid energy losses.

The offline status of solar energy monitoring systems can result from various factors. The most common cause is issues related to the inverter, which may be ...

If your inverter appears offline in your monitoring app but continues to produce power, there's likely no issue with the inverter itself. This situation usually points to a ...

The inverter displays PV Offline. This error occurs on PWRcell systems. Perform a full reset on the system, see the How do I reset my PWRcell system? article for appropriate steps to reset ...
